

# ★ The PA Dream Team ★

## The Pennsylvania Dream Team's PURPOSE:

The purpose of the Pennsylvania Dream Team is to introduce students to STEM career opportunities in today's manufacturing. The typical student in middle school and early high school has no idea of what a job in manufacturing looks like. The most effective way to expose young students to STEM careers in advanced manufacturing is for them to meet young, successful employees who work in the field. Dream Team members are employees under the age of 27 working at area manufacturers who can share their stories, and by doing so, unlock interest among students in these innovative career opportunities.

## The Pennsylvania Dream Team's PROGRAM:

The Dream Team program is comprised of young professionals sharing their STEM careers through live presentations and media exposure. A short video is created featuring the employee in their manufacturing environment. The video captures the young professional at work describing the uniqueness of their job and the educational pathway that prepared them with the right skills. All members of the Dream Team will be equipped with training, materials, shirts, and marketing for presentations at schools and appearances in the community throughout the year.
